

Preventive Services for Adults

These guidelines are minimal requirements for healthy adults with no known medical problems. It should be realized that adults in “high risk” categories or with specific medical problems may require more frequent physicals and evaluations. Ask your doctor about what screenings and exams are right for you and when you need them.

To learn about what immunizations you might need, in addition to your yearly flu shot, please visit the [Immunization Schedule and Preventive Care](#) webpage.

Screenings (*Click on each screening for more information*)
