

Encourage your patients to POWER Up with HIP Plus!

Research shows that patients value the advice given by their provider on their health coverage needs. They want to know who you trust, and which plan will be best for them. That's why it's important you help explain the value of HIP Plus. It is the preferred plan for all HIP members. HIP Plus is the best value because it provides health coverage for a low, predictable monthly cost.

WHY IS HIP PLUS BETTER?

- **Low monthly payment!** HIP Plus members pay a low, predictable payment each month to their POWER Account.
- **No copays!** HIP Plus members don't pay a copay when they go to the doctor, fill a prescription, or have a hospital stay.
- **Dental, vision and chiropractic!** Members with HIP Plus receive dental, vision and chiropractic benefits at no additional charge. Plus, more visits for therapy and coverage for additional services like bariatric surgery and TMJ treatments.

When can a member POWER Up to HIP Plus?

Here are the windows where a member can
POWER UP to HIP Plus:

- 1) **NEW MEMBERS:** New, conditionally eligible HIP members. These are members who have just been approved for HIP and are within their first 60 days.
- 2) **END OF PREGNANCY:** Women who have recently had a child and are within 12 months postpartum. Women will have 60 days after maternity coverage ends to upgrade to HIP Plus.
- 3) **INCOME CHANGE:** Members who had a recent income change and are no longer eligible for HIP Basic. If these members don't POWER Up, they will lose their benefits.
- 4) **REDETERMINATION:** Members who are at the end of their eligibility cycle and are having to re-enroll for their benefits. At this time they can decide to change their

plan from HIP Basic or HIP State Plan Basic and POWER Up to HIP Plus!
