Description

The health and safety of our members is a priority for MHS. One of the ways we address patient safety is through point-of sale (POS) edits at the time a prescription is processed at the pharmacy. These edits are based on FDA recommendations and promote safe and effective medication utilization of our members.

Policy/Criteria

Provider must submit documentation (such as office chart notes, lab results or other clinical information) supporting that member has met all approval criteria.

Approval of use outside the attached documentation would need to reference peer-reviewed published articles to support that off-label use.
