

# School-Based Health Partnerships Survey Report

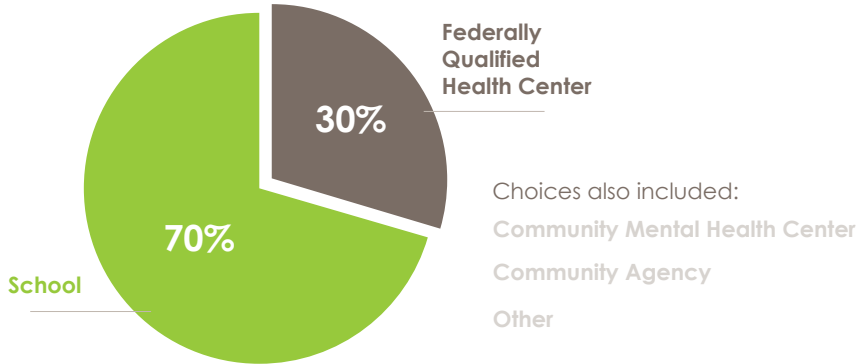

The school-based health partnership survey was developed to evaluate the effectiveness of our partnership efforts around school-based health. Requests for completion were sent to partners who MHS/Cenpatico have worked with over the last few years directly related to school-based health initiatives via email. Two email requests, with survey link included, were sent to partners within a three week time span in April.

## DEMOGRAPHICS

Number of responses for each county:

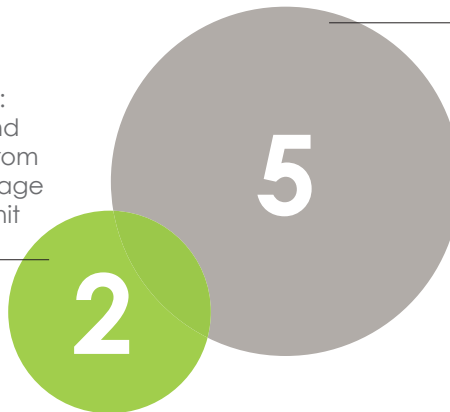

Types of organizations that responded:

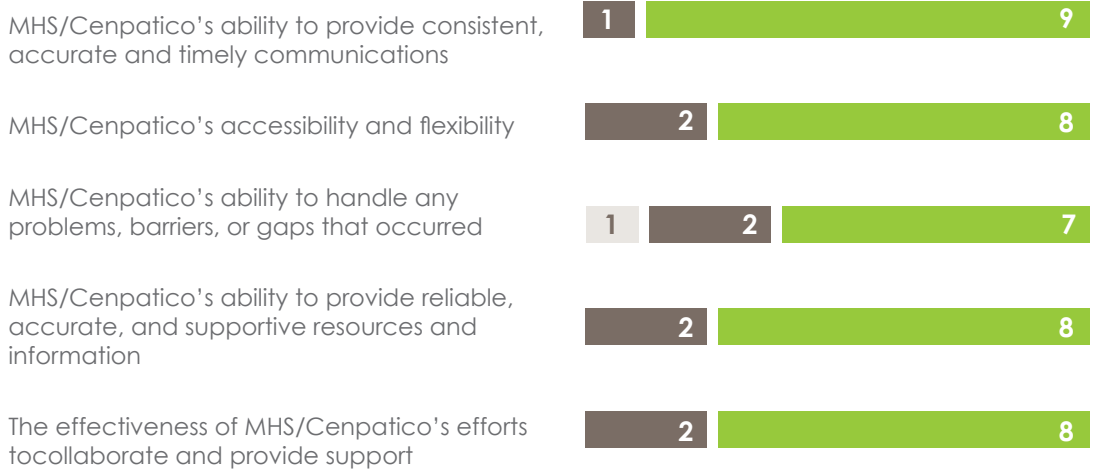

## SUPPORT MHS/CENPATICO HAS PROVIDED

- **Other**— Radio Disney event: Helped develop and summarized data from parent surveys to gage interest in mobile unit services

- Implementation, expansion, quality improvement of a school-based health center
- Adopt-A-School
- General school-based health initiatives, programs, and services

## OTHER WAYS MHS/CENPATICO CAN PROVIDE SUPPORT RELEVANT TO SCHOOL-BASED HEALTH INITIATIVES

- The support from MHS/Cenpatico was exemplary. I was very impressed with the organization of our event, as well as the professionalism of all MHS staff members involved.
- Check in again after the first of the year.
- Always looking for ways to improve the effectiveness of our school community health based clinic.
- Donated clothing, book shelf, literature, P.E. equipment.
- I work at 2 elementary schools, so I would love for my other school to be able to have the same awesome initiatives implemented!

Would you work with or request assistance from MHS/Cenpatico again on future school-based health initiatives?

Would you recommend MHS/Cenpatico's support in school-based health initiatives to another agency?

■ Yes
